

Xylazine Wound Photo: Warnings

Please note the following warnings before viewing the photo on the next page.

Please do not share without permission.

This photo content is intended for individual learning. Please do not replicate any content for further dissemination without explicit permission from the authors. The photo used is from an actual street medicine patient who has given permission for their experiences to be shared by our team. Out of respect for the highly personal nature of these photos, please do not copy and share their images for use in any other presentations.

Graphic content

Please note that the picture is of a medical wound, which viewers may find graphic in nature. Please do not view the next page if this type of content would be distressing.
